QF4 Academy Asia provides course that will equip you with the knowledge and skills to manage your projects more efficiently. The course I went through provided me the necessary tools and techniques to plan, execute and monitor projects in an agile environment.

The team provide course that is suitable for all levels of project managers, from beginner who wants to learn what agile project management is all about, to experienced managers who want to refresh their knowledge of agile practices.

The course has been designed by the team of passionate trainers who have extensive experience in delivering successful training sessions. They also have a wealth of experience in managing projects in an agile environment.

Attended online Agile training on 14 - 18 Feb 2022. Although this is an online session, I find the training as very interactive and they invited external real consultant to teach some of the module. I've attended many trainings in the past and most of the time the trainer will be the similar person for the whole period. For Qf4 Academy Asia, they had at least 5 different speaker for 5 days class.

After completed the training, they still share some information, knowledge, opportunities and maintain some kind of interaction and networking in the whatsapp group even after 1 month later (as of today).

I would be happy to give them high priority and consider them for future trainings if they have the subjects I would need to upskills.

QF4 Academy Asia is doing a great job in conducting courses that could equip the fresh graduates and unemployed people with the necessary knowledge and skills to get a job opportunity they have been looking for. Besides that, people who are already employed can gain some extra knowledge and skills needed for them to be promoted to a better position.

Q4 Academy Asia has just recently organized a training programme known as Certified Professional in Agile Project Management which was conducted by passionate trainers with great knowledge and experience in Agile Project Management. I got the opportunity to participate in that programme and gained a lot of benefits from it like knowledge on Agile Project Management (what is it and how is it being implemented in real life working environment), met new friends through the group activities conducted, and obtained a skill that can be added in my resume which will be an advantage when looking for a job.

I hope QF4 Academy Asia will keep on organizing more training courses and help those who are eagerly searching for a job get the attention of the recruiters or hiring managers.
